AR. HARSHAD PRAJAPATI

The Man Who Designed Success Of Ku-Ke

"I strongly believe that architecture is the reflection of the lives of the people who own it. All my thoughts and efforts, therefore, are dedicated to functional architecture of lasting beauty which communicates what my clients intend to communicate through their space."

Behind every inspiring success story, there's a battle with struggles. A self-made man, Ar. Harshad Prajapati is a graduate from M.S. University of Baroda. Charting his own path guided by none but ethics and values, he has built himself an image as the master of functionality. Ar. Harshad Prajapati is known among his contemporaries for creating no-frills spaces that bespeak maximum utility for his clients.

Holding high regards for relationships in personal life, Ar. Prajapati has translated the same in his professional persona as well as that of Ku-Ke Associates which explains why the firm enjoys immense trust of its clients and boasts of 25 years old and strong relationship with many of its patrons.

AR. TANMAY PRAJAPATI

The Man Who Is Driving The Legacy Forward

"Architecture is a design oriented practice that focuses on achieving successful solutions to each project by striving for an honest, unique language."

Like father, like son. Ar. Tanmay Prajapati, son of Ar. Harshad Prajapati, is an architect by passion, precision and profession. A graduate from the CEPT University of Ahmedabad holding Post-graduation in urban planning, he puts forth his prowess for giving shape to well-derived designs.

Spearheading fierce next innings of Ku-Ke Associates, Ar. Tanmay Prajapati represents young, dynamic and ambitious face of the firm. Under his leadership, the firm thrives with an urge for innovative designs and creating monumental edifices while maintaining the firm's core values of functionality and client satisfaction.

Id. Mrs. Indira H. Prajapati

Ar. Mrs. Mansi T. Prajapti

Ku-Ke Associates is zealously joined and empowered by the woman power of the family. Mrs. Indira Prajapati (wife of Ar. Harshad Prajapati) and Ar. Mrs. Mansi Prajapati (wife of Ar. Tanmay Prajapati) form an integral part of the firm as they shoulder key responsibilities of the company, thus making Ku-Ke Associates pride in its rare blend of family and professional values.

Mrs. Indira Prajapati is a graduate in Interior Design and Human Resource Management besides being a great home maker. She is skilled at striking a perfect balance between her duties as Finance and HR Head of the company and home minister of her family.

Ar. Mrs. Mansi Prajapati, a graduate from CEPT University, on the other hand contributes her strength in heading challenging interior design and landscape projects of the company. Uncompromising as she is for her clients' needs, so is she for her family which leads her to give equal priority to her personal and professional commitments.

Deriving Shelters For Life, Since 1989.

Driven by unrelenting desire to create signature projects en route to architectural success, Ku-Ke Associates is an ardent follower of functionality and beauty which dictates the thought process behind every design laid out by the firm.

Led by father-son duo, Ku-Ke Associates has been crafting benchmark spaces with passion for fine and remarkable architecture.

Gushing forth with intellect, insights and integrity over years, Ku-Ke Associates has designed 70 Million Sq. Ft. of space for townships, private residences, farm houses, malls and multiplexes, commercial plazas and corporate houses across India, USA, Australia and East Africa.

Testimonials of Esteemed clients

"I have known Ar. Harshad Prajapati from the time when he had just begun his journey as an independent architect. It's been more than 25 years to our professional association which has made us bond like a family."

I am extremely impressed and happy with the contemporary and innovative design approach of Ar. Tanmay Prajapati. I am sure he will lead Ku-Ke Associates to new heights.

Ar. Harshad Prajapati is rightly called master of functionality. I remember, years back, how he dictated that he will change the design contrary to our brief. We are happy that we gave in and allowed him to design our residence as per his insights.

We love the work of Ku-Ke Associates. Our school was designed by them and it has turned out to be one of the most unique academic structures.

We recently got our office building designed by Ar. Tanmay Prajapati and he and his team has done a commendable job. His quest for futuristic designs is what clicked us in an instant because that is what we wanted - the futuristic, innovative design for our corporate house.

It has been a wonderful journey working with Ku-Ke Associates as the chief architect and master planner of our weekend homes project. Their professionalism and commitment to deadlines is appreciable and architectural excellence, undisputable.

" What I liked the most about Ar. Harshad Prajapati is that he does not blindly follow trends but he follows insights. He has the courage to go against the trends and yet create remarkable structures as he did for us.

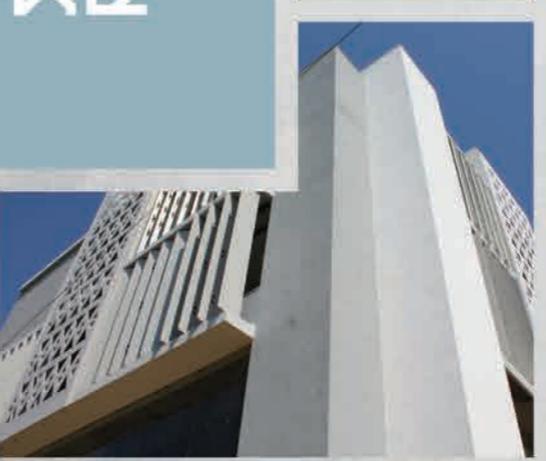

" Our only brief was to design a unique residence while maintaining all the natural elevations on the land. We did not want to level the ground up as we wanted to keep it as is. Ar. Tanmay Prajapati took up the challenge and he has won our hearts by creating a residence that looks surreal.

" KuKe Associates has never disappointed us. They have always delivered excellence in design. Equally admirable is their dedication as they have never failed in meeting our expectations and timelines.

" For us, it is like a one stop solution for all our architectural needs. The father-son made it possible for us to have an ideal home which neither compromises on functionality nor sacrifices its visual appeal.

" Our farm house was designed by Ku-Ke Associates. When people tell us how much they admire our farm house and wish to have one like ours, we feel it was a right decision to choose Ku-Ke over others.

" Ku-Ke Associates is one of the best architect firms I have known. It values people and relationships, be it with employees or clients. Their personal touch makes every project special.

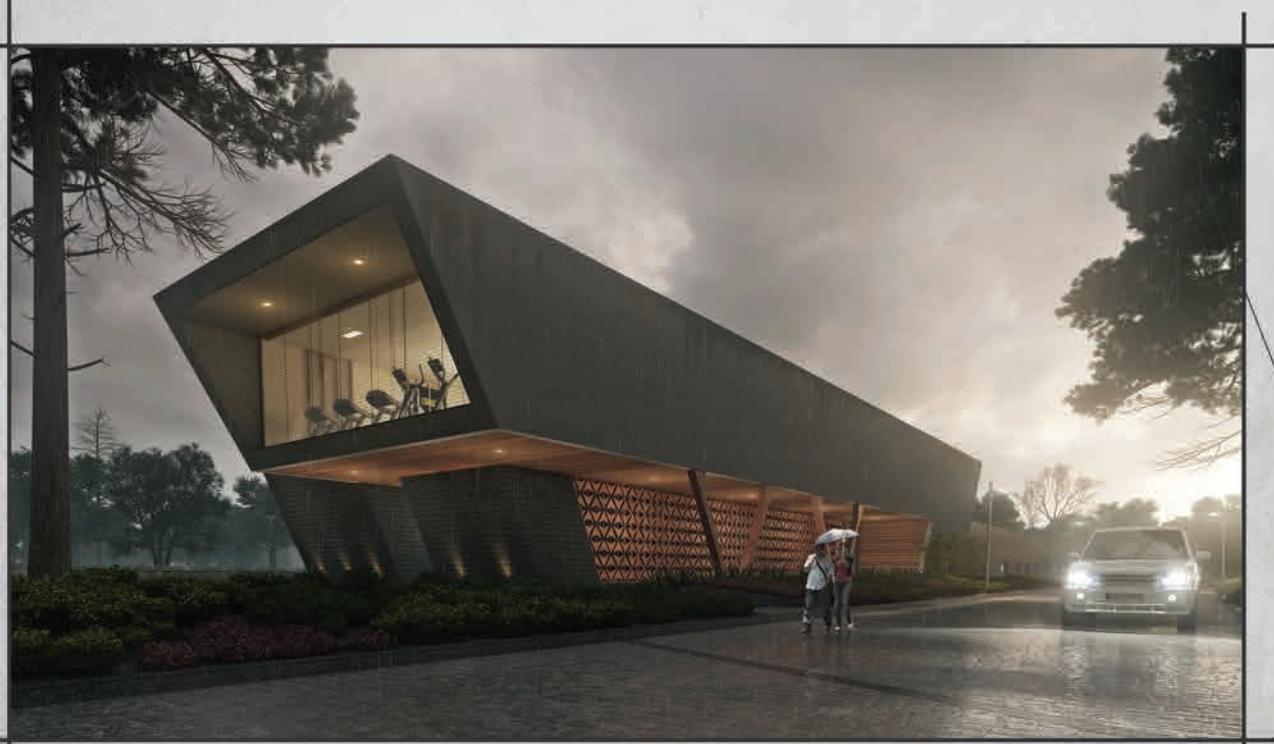

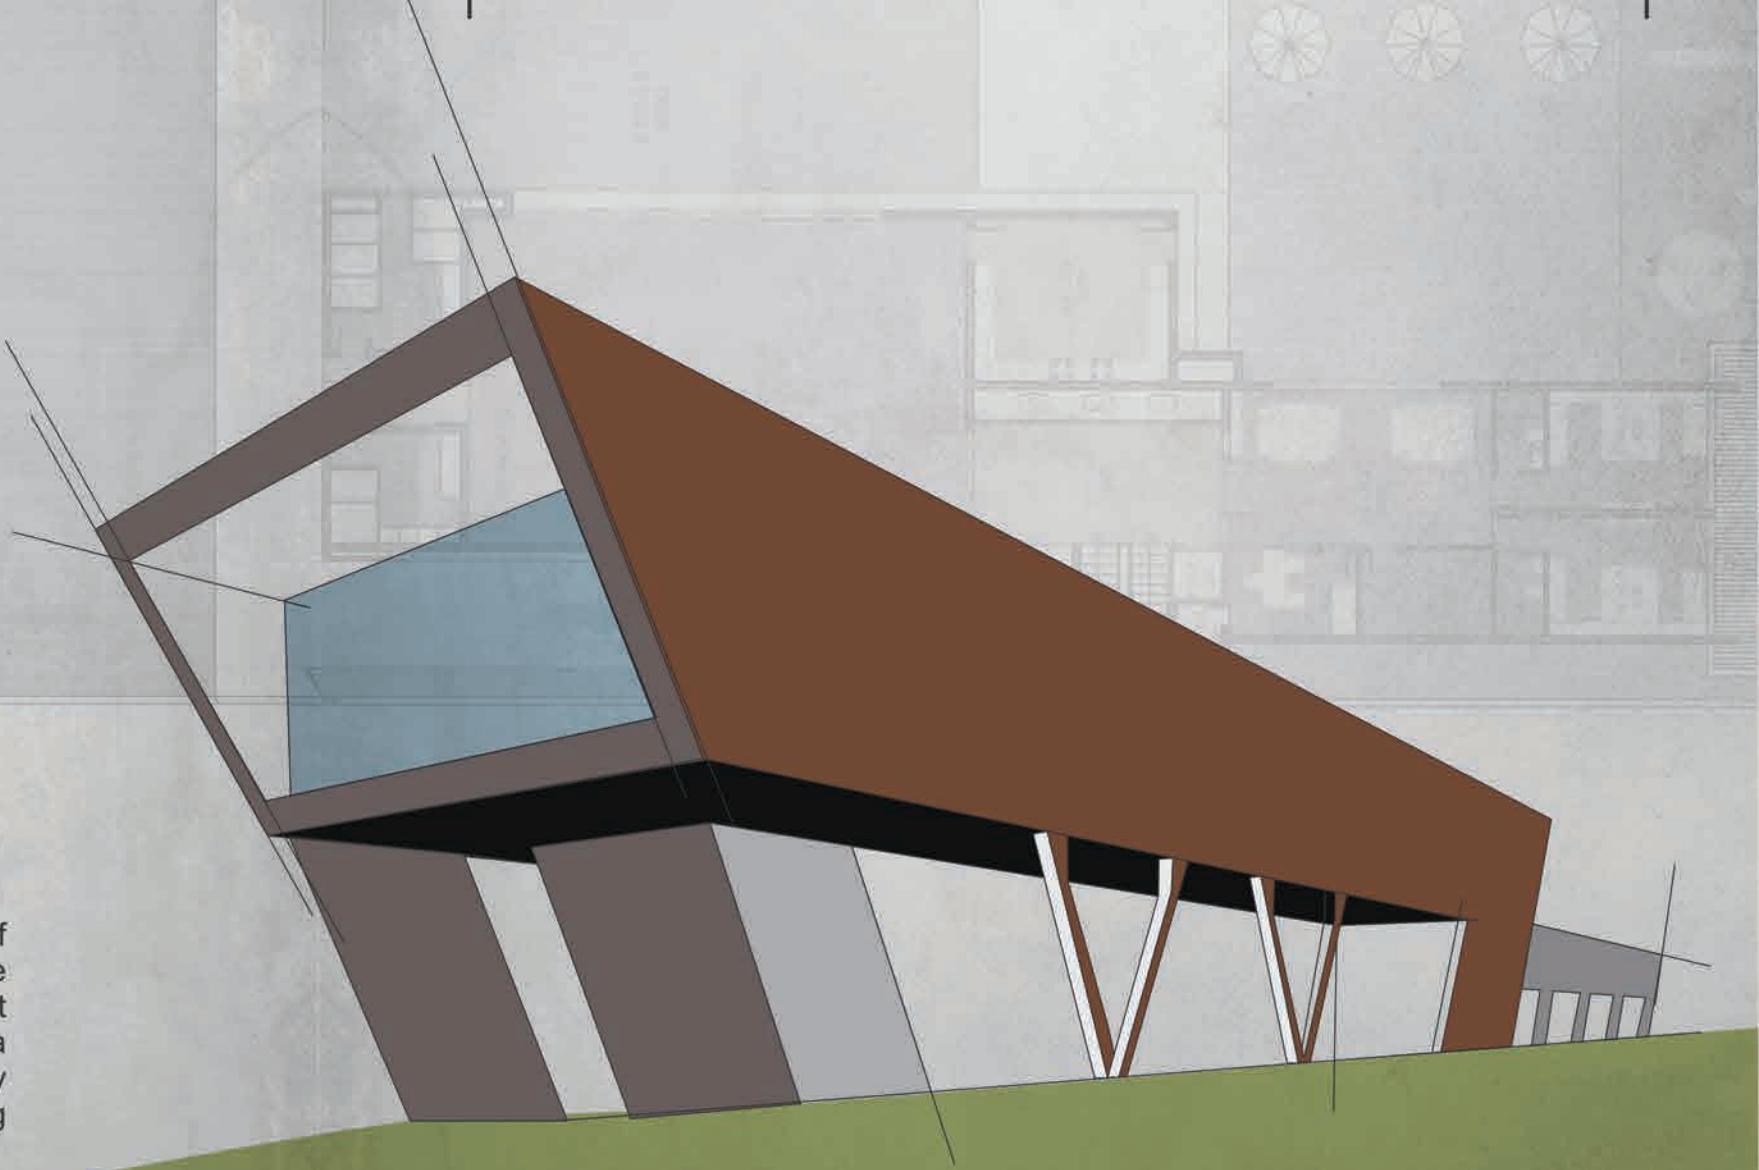

The Pargola

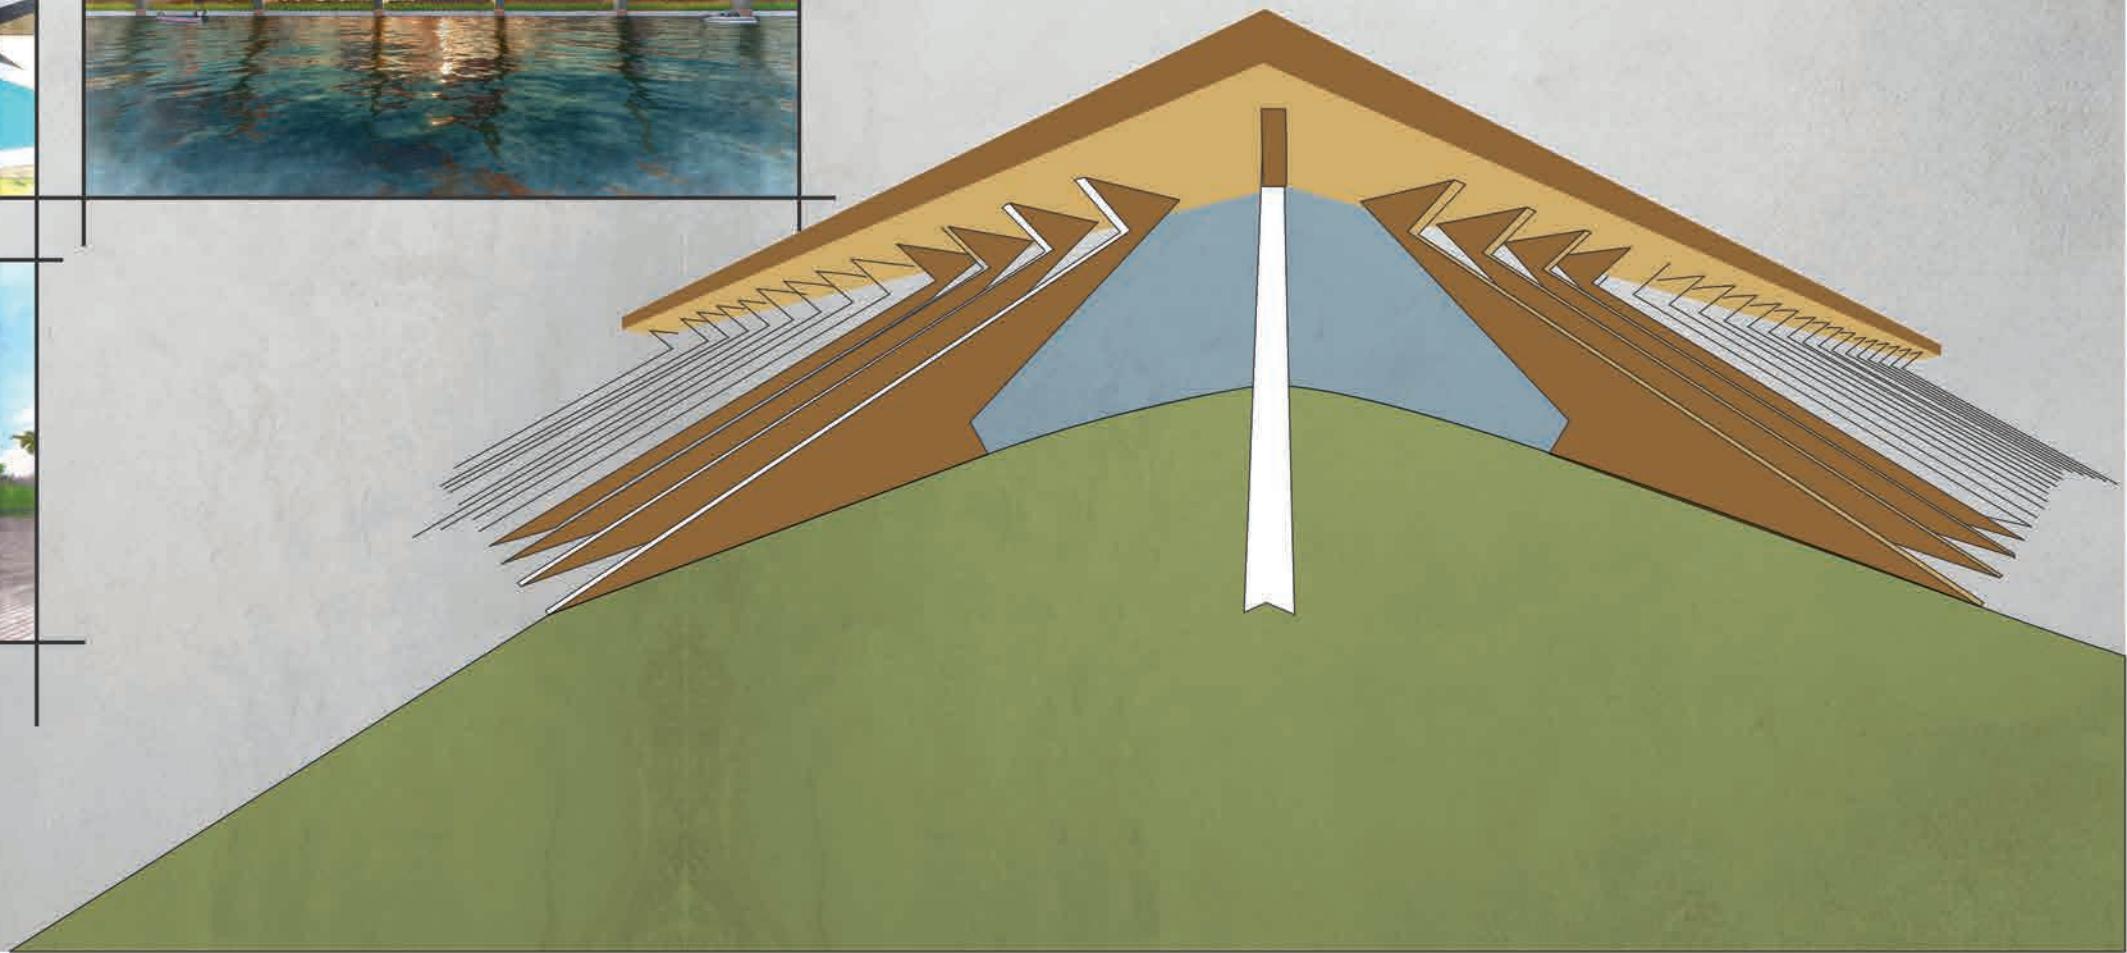

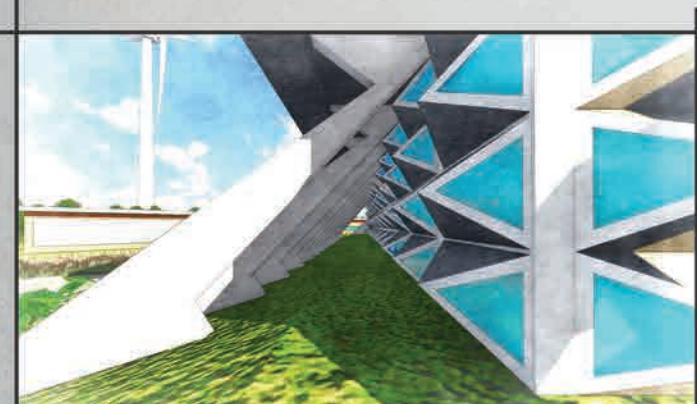

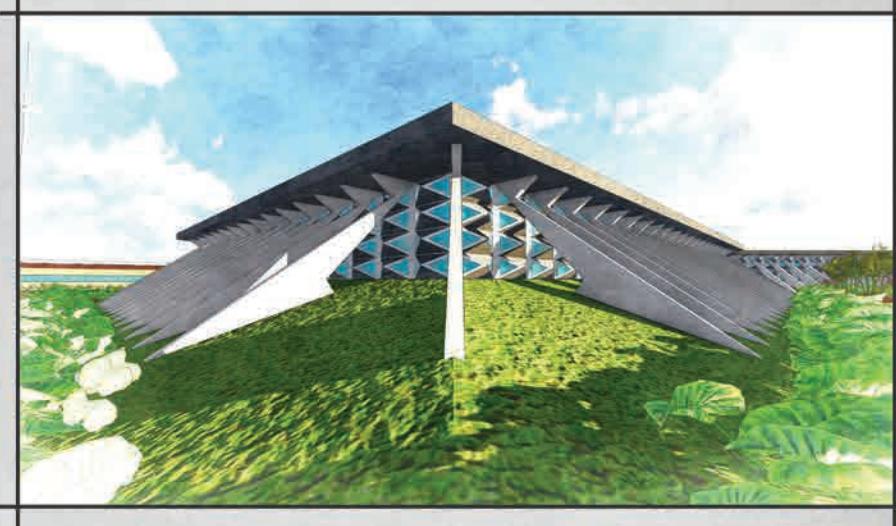

A fine representation of introvert architecture conceived for an international school. The project highlights an unconventional placement of academic blocks in J shape and a centrally accessible courtyard. The design was ideated after an intent consideration for achieving dual purpose of maintaining privacy of each block while establishing a visual connection throughout the school premises in a functional yet aesthetically appealing way.

The Kinetic

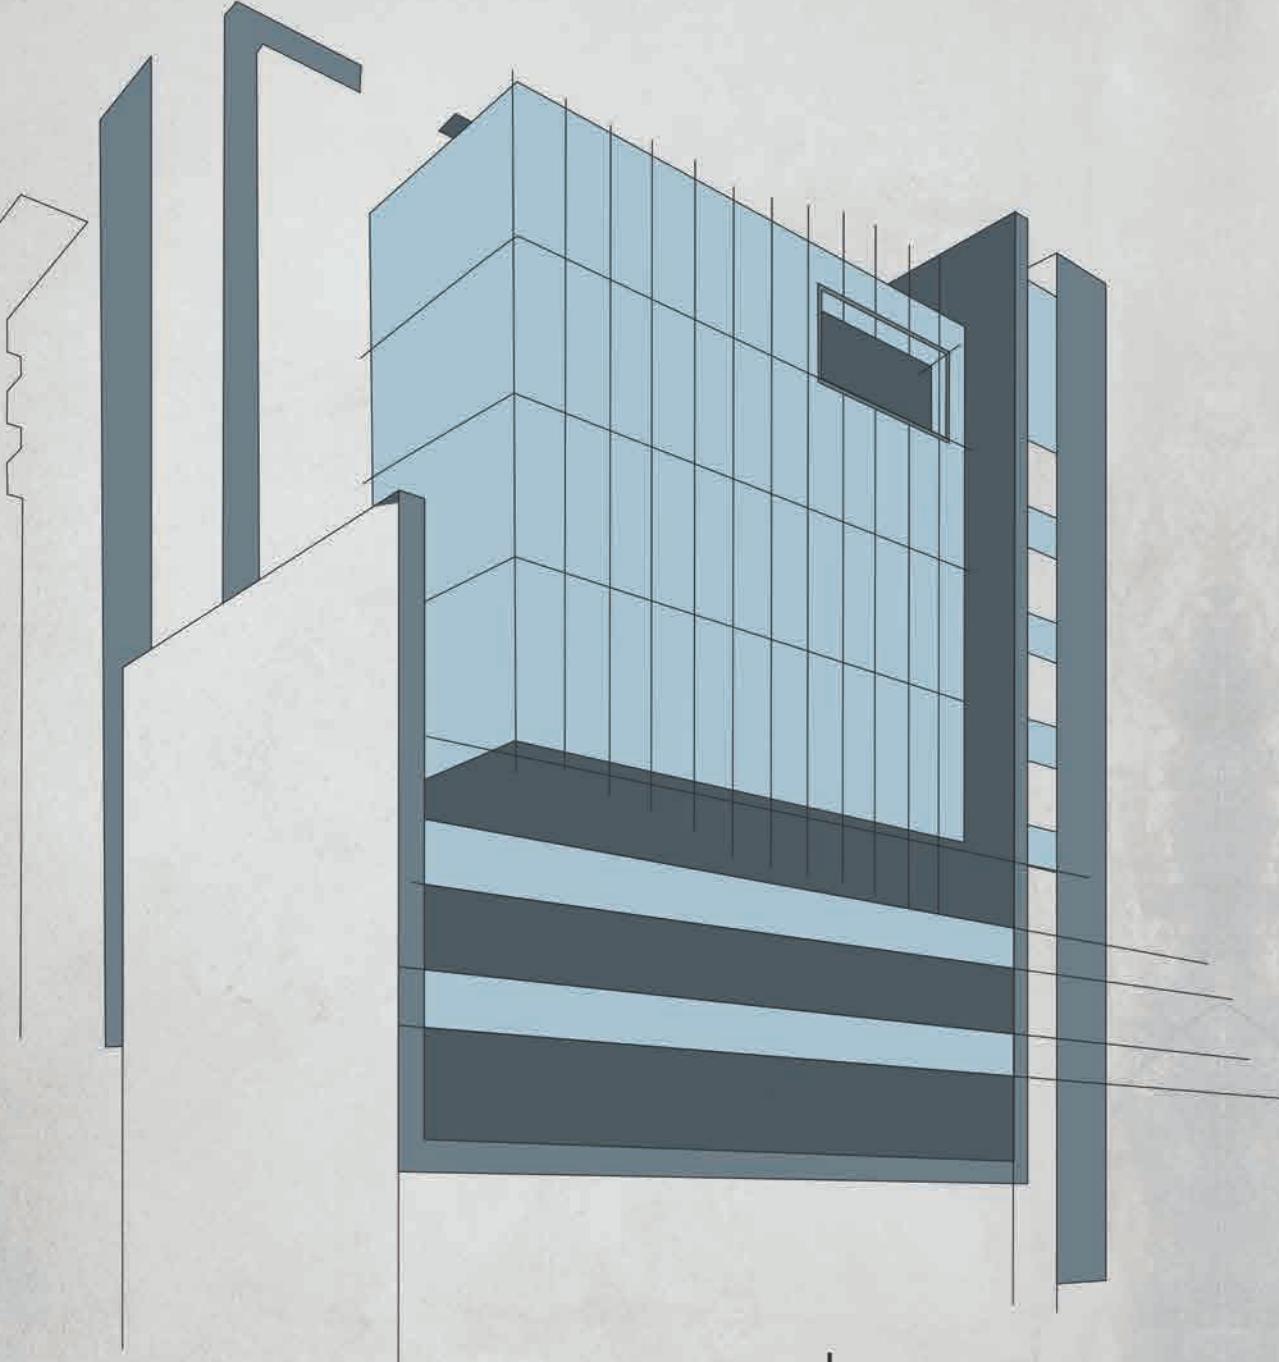

Young, energetic and powerful. The three vital design personality traits of a plush, high-end and captivating residential plot scheme meant for the select few. The project of limited edition plots seats an extravagant clubhouse with an infinity pool designed on the first floor. The design idea is derived from the thought of channelizing positive energy symbolically through the shape, the levitating edge of the club house and an inviting entrance gate that together mark the distinctness of the project.

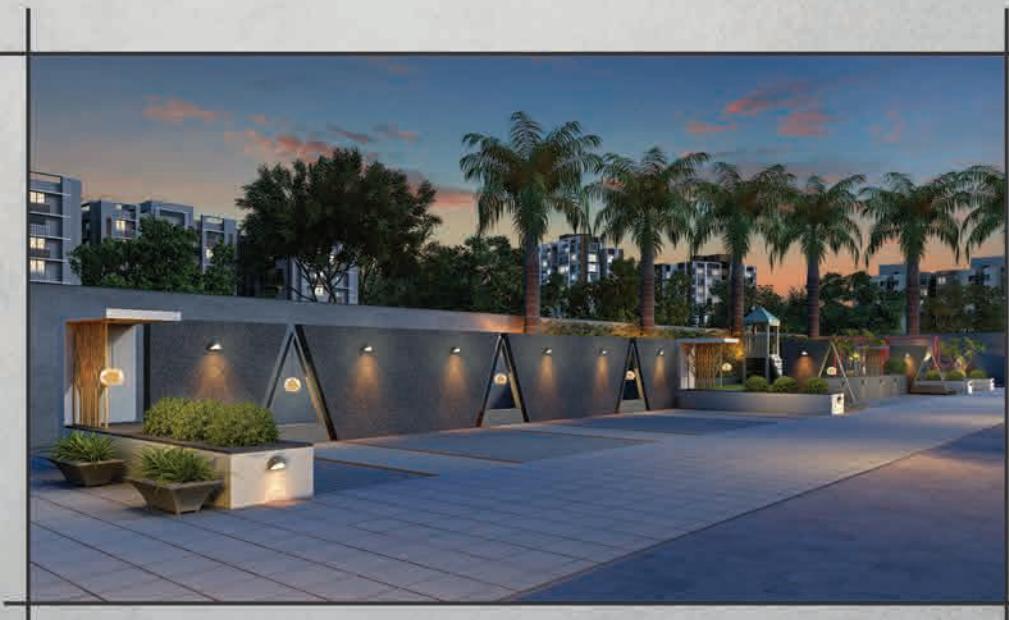

The Timeline of Inspiration

An inspiration for the future. The expression of strengths through design. The raw design idea for a museum that tells stories of wisdom, leadership and achievements. The incorporation of Swastika as a key design element represents piousness of the place of great significance for the next generations. The sharp-edged 108 columns supporting the RCC slab are symbolic of 108 hands in support. While the 7 pillars in the design signify 7 notable achievements of the leaders of the bygone era.

The Cube

A symbolic representation of different perspectives. The first high-end, 4 BHK residential project in the locality is interestingly fused with commercial spaces of equal stature. The conception of design idea branched from the shape of a cube essentially to provide the beholders a distinct view of this landmark edifice from every angle.

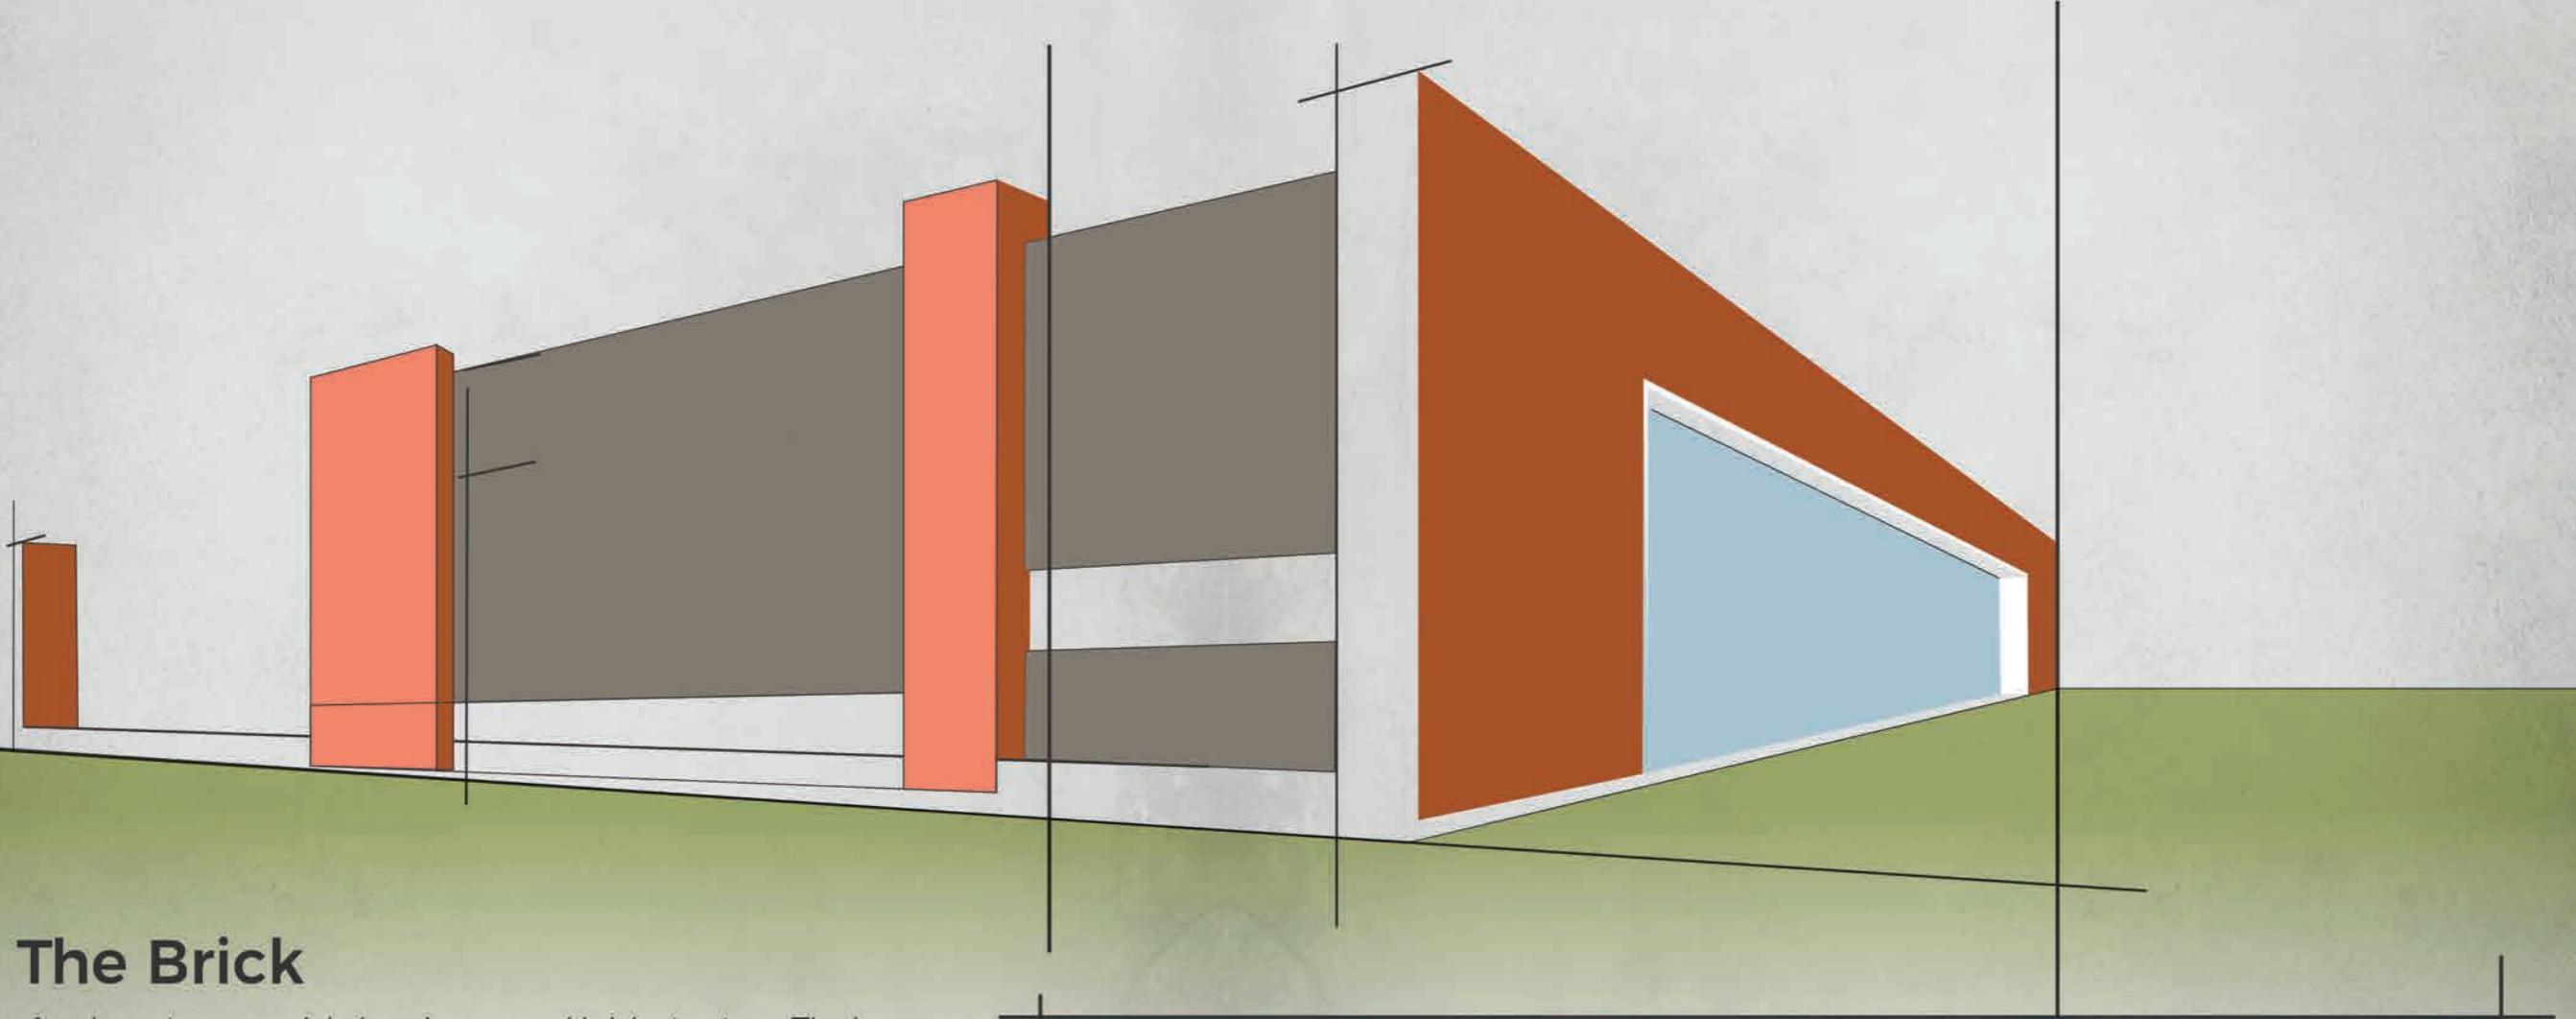

The Swing

Emulating a golfer's signature swing. The project, a farm house villa for a golfer, reciprocates the golfer's connection with his game through its unique shape. The design idea of the villa was creatively conceived with a core thought of giving a form to the aura of the golfer's swing which is enchanting to the client as well as the beholders.

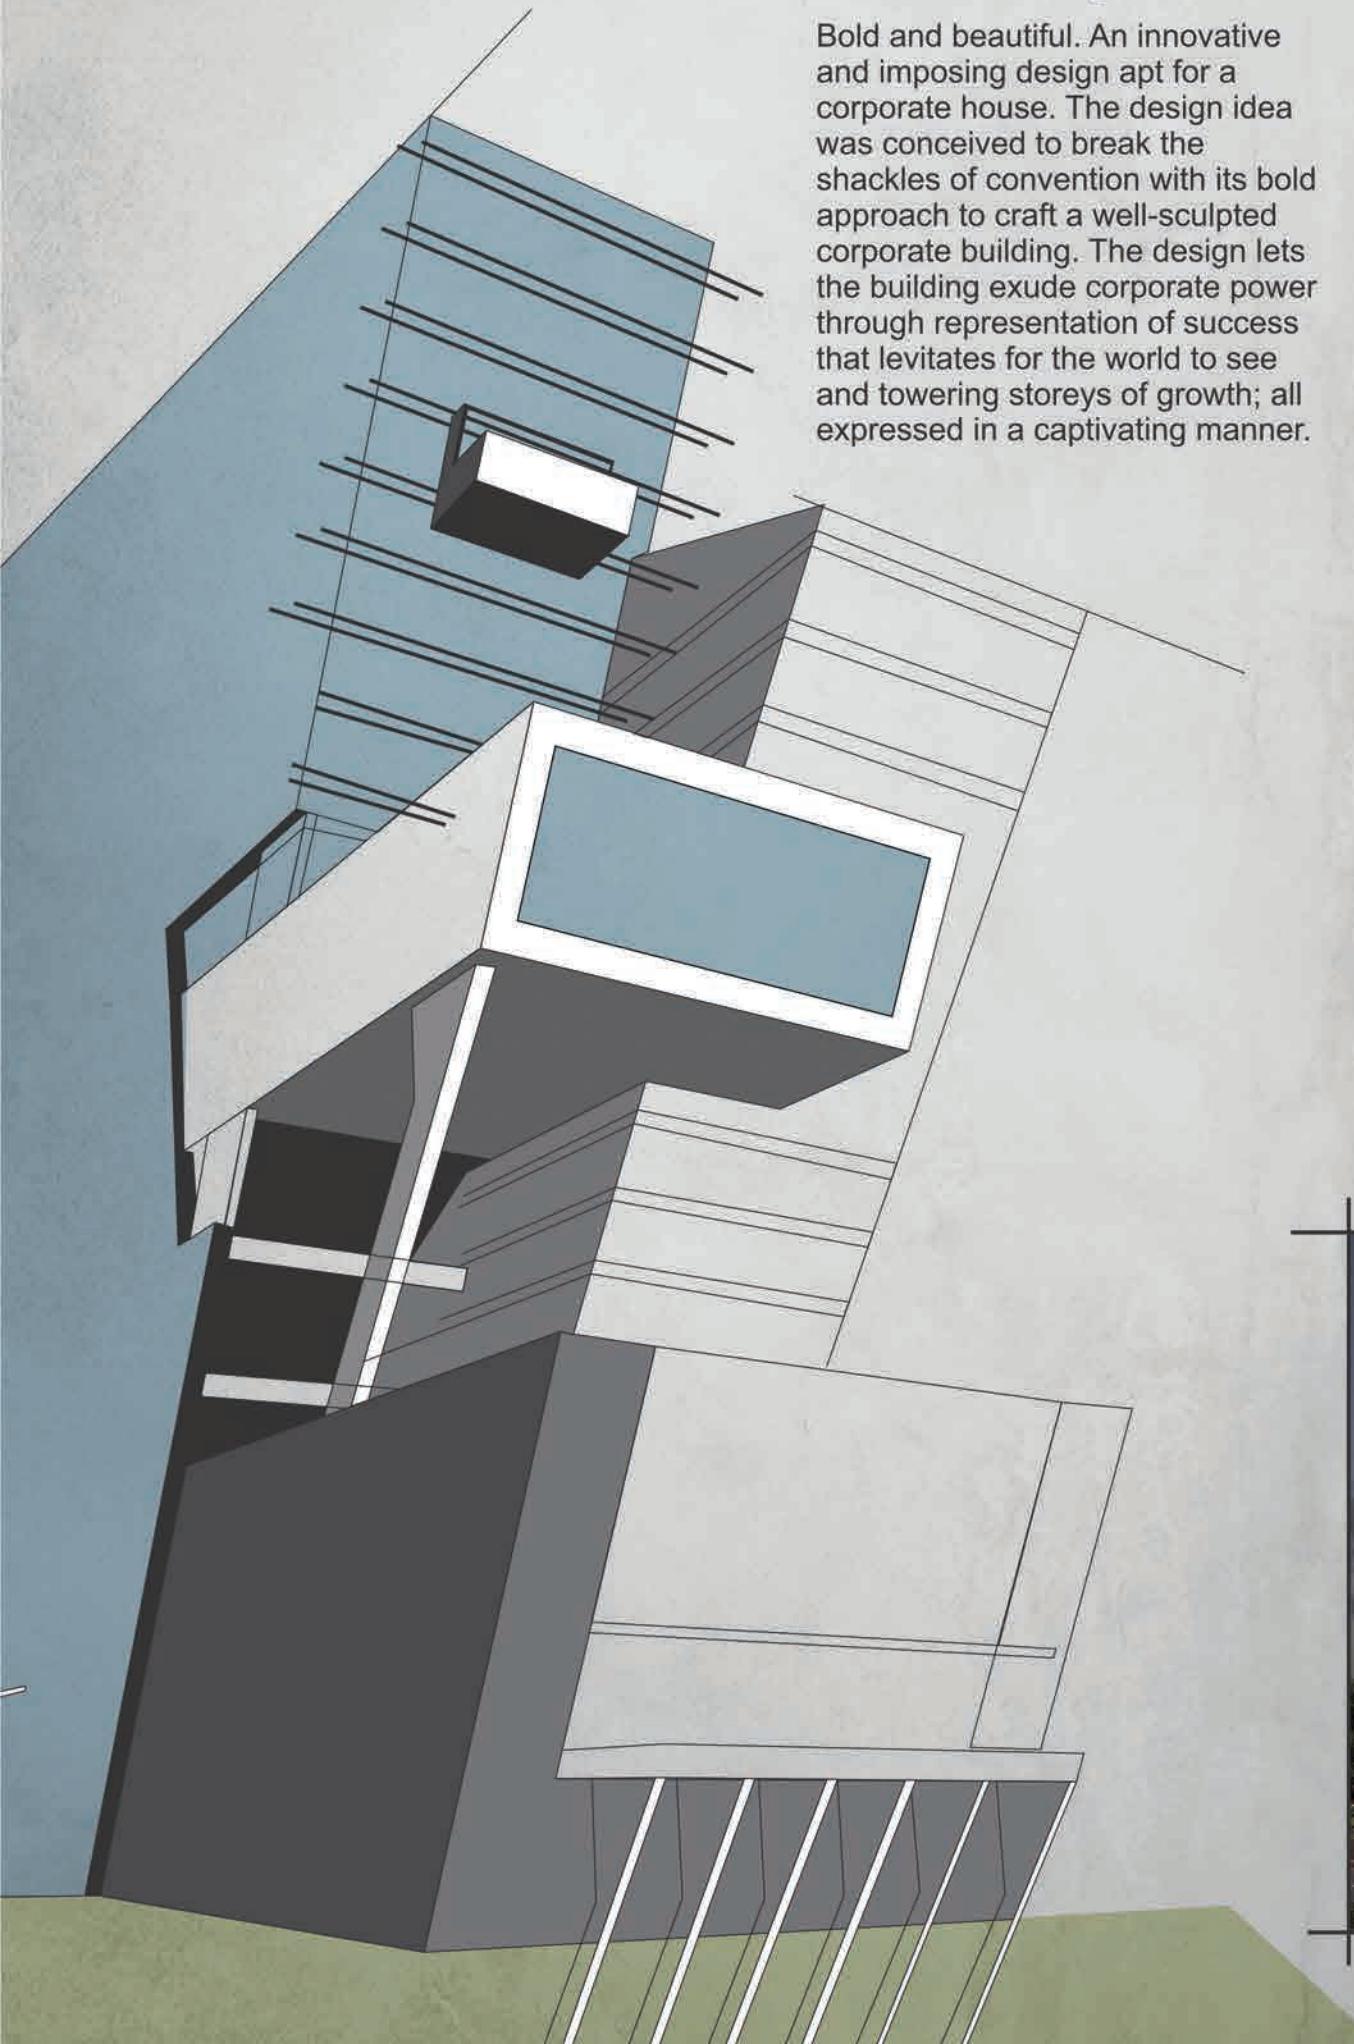

The Brick

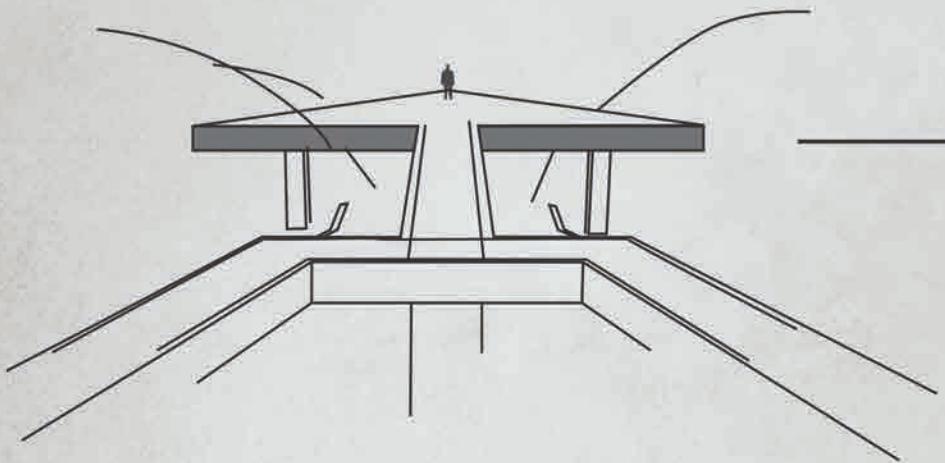

An elegant ceremonial place in exposed brick structure. The low lying edifice with convention center and banquet hall was designed pragmatically to meet the key requirement of easy connectivity and accessibility throughout the premises. Keeping with the functionality of the place, the banquet is so designed to enjoy direct connectivity to the open garden area while the proportionate exposed bricks uplift the visual charm of the place.

The Sculpture

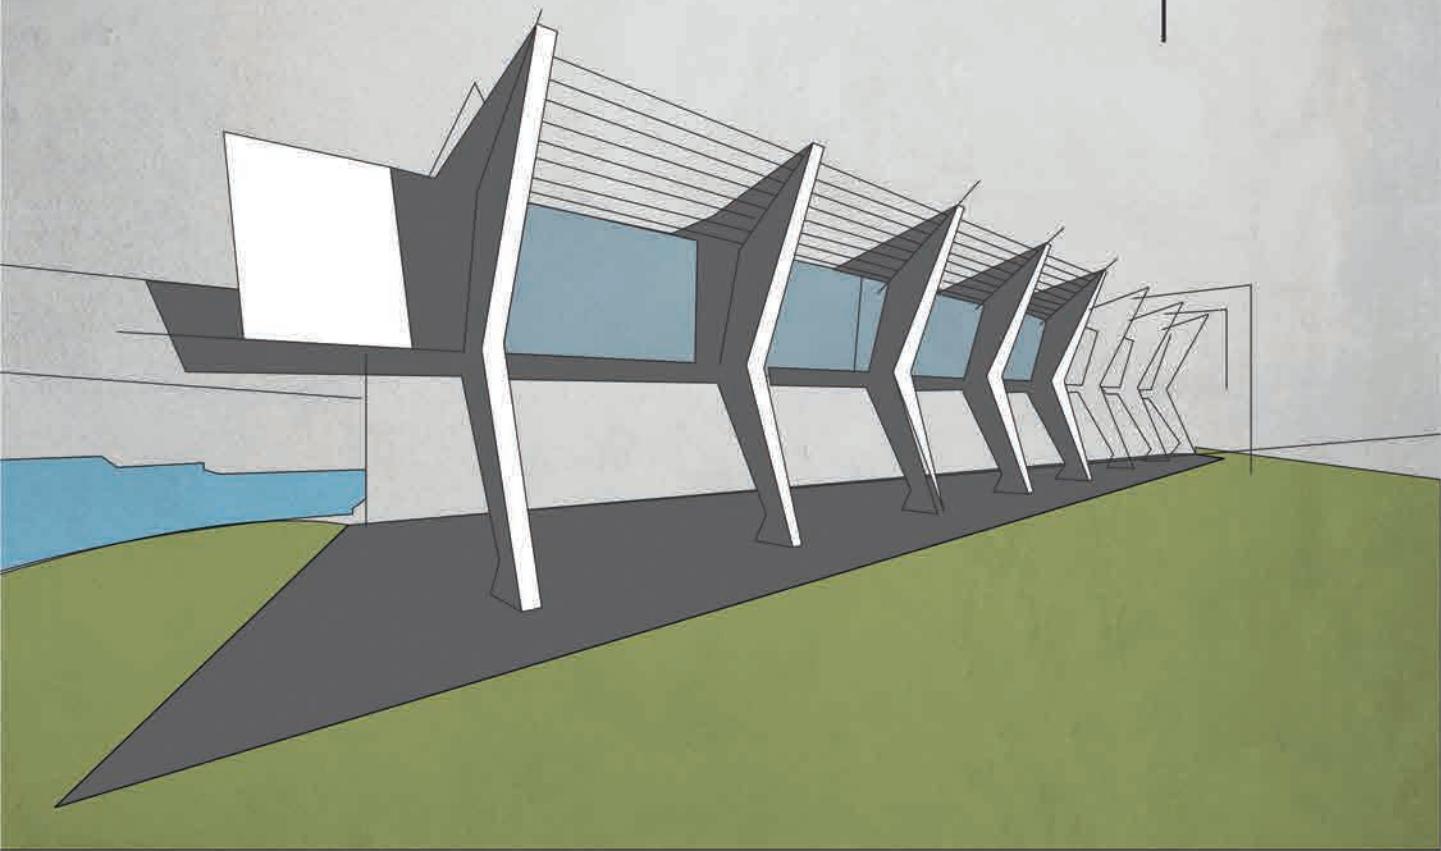

Bold and beautiful. An innovative and imposing design apt for a corporate house. The design idea was conceived to break the shackles of convention with its bold approach to craft a well-sculpted corporate building. The design lets the building exude corporate power through representation of success that levitates for the world to see and towering storeys of growth; all expressed in a captivating manner.

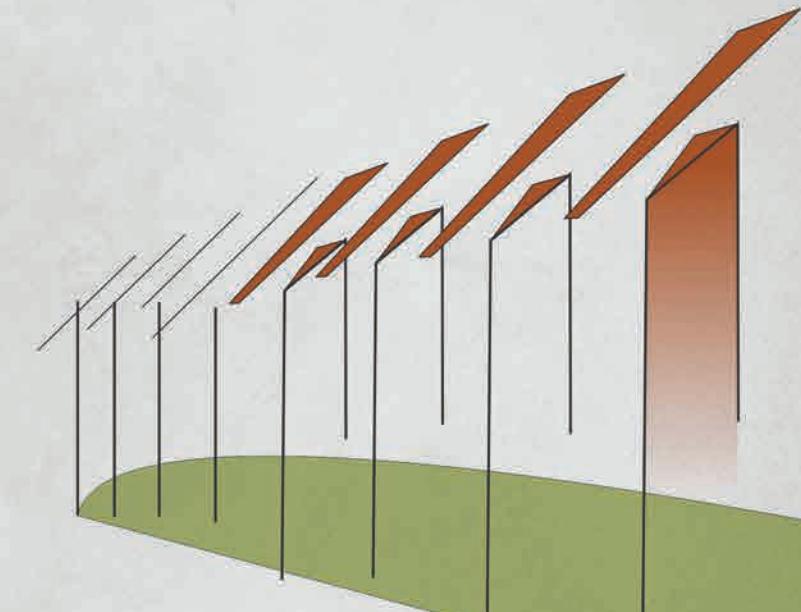

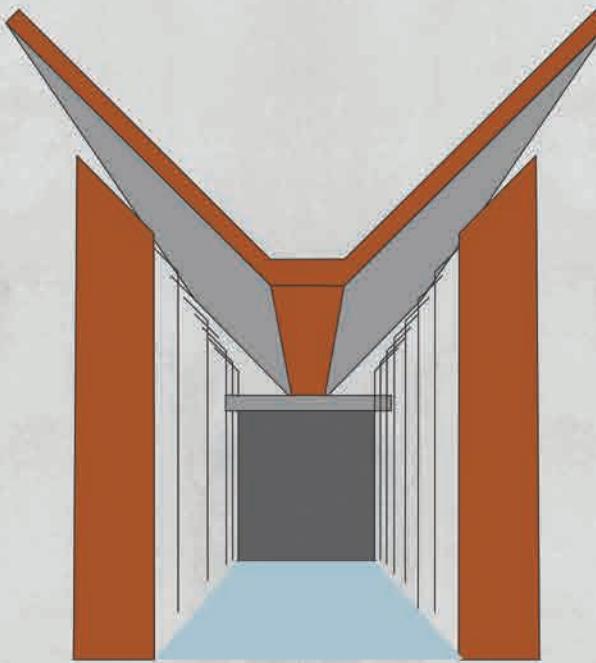

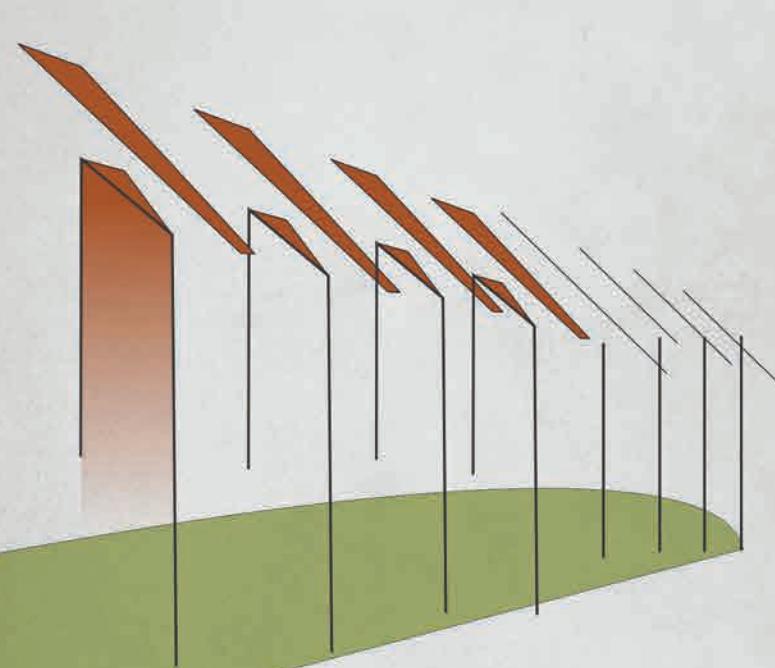

The Alien

A mystery that unfolds itself. A splendid example of introvert architecture, the farmhouse project is a masterpiece in itself. Perched in a secluded place hidden from the outside world, the project was intelligently designed to maintain the mystery quotient of the place as that of an alien. With an appearance akin to a crocodile, the farmhouse design was conceived after capturing the crux of the place that engulfs hilly patches and water bodies.

The Wing

An essence of good life. The first of its kind, premium residential bunglows project in the locality aimed at providing dream dwellings to the patrons of good life. The design was spurred by a deep rooted idea to craft several unique bunglows with individual courtyard to allow patrons the freedom to live their dream life.

Ku-Ke Environment Foundation

An environmentally conscious and sensitive firm, Ku-Ke Associates religiously follows its self-laid rule of maximum green cover per project.

The rule that branched from the roots of personal belief of the promoters, has now grown into a dedicated CSR (Corporate Social Responsibility) initiative under the aegis of Ku-Ke Environment Foundation. The foundation serves to provide education, encouragement and inspiration for massive tree plantation at the project sites of the company, thus ensuring creation of conducive life and work spaces.
